Making Montana PROUD

Everyone faces obstacles in life, and I'm no different. Some obstacles I've failed to overcome and other times I've been successful. A support system and my own perseverance have been the primary differences between my failures and successes. Resilience and persistence are critical in achieving anything worth achieving. Those who persist are the ones that find success. Through education I've been able to play college football, meet some of my best friends, travel across the country, and get a career that I love.
