Executive Director of the Montana
Consortium for Urban Indian Health

Making Montana PROUD

I encourage youth to challenge yourself, even if it is uncomfortable to prepare yourself for your career and the journey of life to becoming a leader. Remember where you came from, and the leaders who came before you, because they built a roadmap for you to follow as a leader. A major factor in my success today is because of my own resilience. The support from my family and friends has also been key, in helping me lead and solve problems I face today and in the future.
